Spy IP Camera with Pan Tilt Zoom (PTZ), motion detection, and even records audio on top of great quality video...not only can you spy on people, now you can spy on people from anywhere in the world!

If James Bond were a wizard class hacker he'd totally use the i52 **Spy IP Camera** for all his surveillance needs. Place this spy ip camera anywhere in your room - hidden between the teddy bears on the shelf or between your CD collection. Then use the Pan Tilt Zoom function to see everything the camera sees!

The I52 **Spy IP Camera** lets you view, stream, and even record from another room, another building, or even another country because it works with your computer's networking system to support LAN, Intranet, and even Internet monitoring.

But there's more. To extend the power of this amazing **Spy IP Camera** we gave it motion detection functionality and email alerts. The benefit to you - if something moves, the **Spy IP Camera** detects it and instantly notifies you by email. Awesome huh?

At a Glance...

- Access camera output from anywhere on the Web
- Record audio and video footage
- Video surveillance with audio from the comfort of your chair (or anywhere!)
- Quality CMOS sensor
- Angle control and motion detection
- Email alerts
- Unique design that allows it to be hung on the wall
- 30 frames per second video!

§ Camera Information:
- Sensor: 1/4 inch CMOS
- Angular control: YES
- Motion detection: YES
- Email alerts: YES
- Horizontal Definition: 420 TV Lines
- White balance: AUTO
- Effective Distance: 50 meters

§ Image Information:
- Video Resolution: VGA (640x480), QVGA (320x240), QQVGA (160x120)
- Video Frame Rate: 30 fps
- Video Format: ASF (XVID MPEG4 codec)
- Video File Size: ~ 7 MB / min (VGA)
- Still Image Format: JPEG

§ IP Information:
- Connectivity: Wired (RJ-45/10-100 Base T)
- Requires Computer: NO
- Certification: CE, FCC
- Dimensions: 95 x 73 x 47 mm (H x W x D)

Product Notes

- Setup is really easy. Plug the IP spy camera into a power outlet. Connect your Ethernet cable to the IP spy camera. Install the software. The program generates an IP address. Paste that IP address into your Internet Explorer and instantly view or record this camera's streamed videos. That's all!
- Recording camera output is done through your IE browser. Simply install the software on disk and it will add viewing and recording functionality to your browser.
- Unlike other IP security cameras, this one records AUDIO and video with it's built-in MIC and CMOS lens
- Great alternative to a baby monitor!

Package Contents for Model CVOI-I52

- IP Security Camera
- Power Adapter
- Mounting Kit
- CD - (English User Manual, Software)

FAQ - Frequently Asked Questions

- **Is this camera PAL or NTSC?**
  The concepts of PAL and NTSC are irrelevant when it comes to web surveillance cameras. It will work with any display.
- **How does motion detection work?**
  After you install the software, run it to get the IP address of your camera. Fire up your browser and enter the IP address. You'll see what the camera sees as well as settings to enable motion detection and email alerts. You'll need the email address you want the alerts sent to as well as the smtp information. For example, if you're configuring gmail it would smtp.google.com, you're done. When there is motion detected you'll receive an email alert with a snapshot of the camera saw.
- **Is this the IP Security Camera (Angle Control + Motion Detection + Audio) that I've seen on your site before?**
  This is the improved Spy IP Camera version!
